

Retraction Notice for “Differences of Chemical and Physical Properties on Fractionated Dissolving Pulp During Alkalizing and Aging Process”. International Journal of Technology, Volume 15 Issue 2, pages 279-288, published on February 5, 2024.

It has come to our attention, after thorough review and after lengthy discussions with all authors, that a sizable portion of the article titled "Differences of Chemical and Physical Properties on Fractionated Dissolving Pulp During Alkalizing and Aging Process" published on February 5, 2024, in Volume 15, Issue 2, pages 279-288, infringes upon the intellectual property of another entity. In particular, the piece included content for which the writers had not properly gotten authorization from the legitimate owner. This incident was missed during the peer review procedure.

Consequently, we have decided to remove the aforementioned article from our publication in order to respect intellectual property rights and adhere to legal and ethical requirements. This retraction is not a reflection on the caliber of the work or the authors' integrity; rather, it is intended to correct the record and guarantee the respect of intellectual property rights.
