

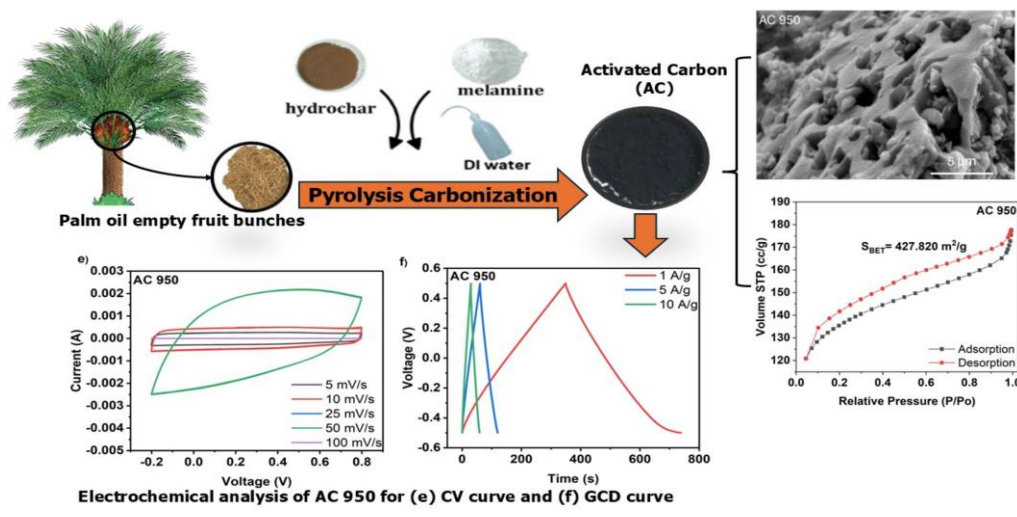

Graphical Abstract

International Journal of Technology (IJtech) uses graphical abstract to promote articles through email content, social media, newsletters, online search results and/or other platform. You are encourage to submit a graphical abstract in submission as part of the article, in addition to the text abstract. We encourage you to view example graphical abstract and read about the benefits of including them. Some guidelines as follows:

- Graphical abstract is the key 'results' image from the paper itself, thus it is specially designed figure that captures the key takeaway message of the paper, enables the viewer/reader to understand the content of paper and also to attract the attention of a wide readership. It is a single image that summarises the main findings of the article and do not replicate all the information in the text abstract.
- As part of the article, the graphical abstract will be displayed on article page in the website of Internasional Journal of Technology.
- The graphical abstract must be uploaded as separate files in either .jpg or .tif format with a resolution of at least 300 DPI. Figures should be sized for either a single column of print (85 mm width) or a double column of print (177 mm width). The images should be clear without blurry edges or text that is difficult to read
- For example, please see graphical abstract in below.

Electrochemical analysis of AC 950 for (e) CV curve and (f) GCD curve
